

AL-BARAA MOHAMED

Junior Frontend Developer

Ismailia, Egypt

+20 101 427 9025 albaraamoh41@gmail.com linkedin github

Education

Suez Canal University

Bachelor of Science in Computer Science

October 2023 – June 2027

Ismailia, Egypt

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++

Front-End: HTML5, CSS, React.js, Next.js, Tailwind CSS, React Router, Framer Motion

Back-End: Spring Boot, REST API Development, MVC Architecture

Developer Tools & Platforms: VS Code, Git, GitHub, IntelliJ IDEA, Vercel, Windows PowerShell

Training & Experience

FlyRank AI

Expected July 2026

Front-end AI Engineering Intern

Remote

- Selected for an upcoming internship focused on integrating artificial intelligence models with modern frontend interfaces.
- Preparing to develop responsive UI components utilizing React and TypeScript to support AI-driven web applications.

Digital Egypt Pioneers Initiative (DEPI)

Dec 2025 – July 2026

Front-End Development Trainee

Remote

- Participating in a national training program focused on modern front-end development.
- Learning and building responsive, component-based applications using HTML, CSS, JavaScript, TypeScript, and React.
- Exploring state management concepts and integration with backend APIs.

Information Technology Institute (ITI)

Early 2026

Advanced Frontend Web Development Trainee

Ismailia, Egypt

- Completed an intensive 162-hour course dedicated to advanced frontend technologies and modern web performance best practices.

Information Technology Institute (ITI)

June 2024 – August 2024

Java Development Trainee

Ismailia, Egypt

- Built multiple Java applications applying object-oriented programming principles.
- Collaborated in a team to develop a Java-based drawing application similar to Windows Paint, utilizing Git for version control to ensure code integrity and smooth collaboration.
- Used Visual Studio IDE and followed clean, structured code practices.

Projects

Personal Portfolio Website (In Progress) | React, TypeScript, Tailwind CSS, Framer Motion

April 2026 – Present

- Designing and developing a high-performance, responsive personal portfolio to showcase technical projects and professional identity.
- Implementing smooth animations and interactive elements using Framer Motion to enhance user engagement and visual storytelling.
- Optimizing web performance and SEO through modern frontend practices, ensuring fast load times and accessibility across all devices.
- Utilizing Tailwind CSS for a streamlined, utility-first design approach, achieving a consistent and polished UI/UX.

TROSC Team Website (In Progress) | React, TypeScript, Tailwind CSS

January 2026 – Present

- Collaborating in an agile team to develop the official website for the TROSC team using React and TypeScript.
- Responsible for implementing the frontend interface based on detailed UI/UX design specifications.
- Working closely with a backend developer to seamlessly integrate frontend components with backend REST APIs.
- Building reusable and scalable React components using modern frontend development practices.
- Collaborating using Git and GitHub for version control and a highly organized team development workflow.

ToDo App | React, Tailwind CSS, React Router, Vercel

July 2025 – September 2025

- Built a modern single-page ToDo application using React and component-based architecture.
- Programmed full task creation, editing, and deletion (CRUD functionality).
- Implemented a basic authentication flow (Sign Up / Log In) and used React Router for smooth client-side routing.
- Designed a responsive and clean UI using Tailwind CSS and deployed production builds to Vercel.

Extracurricular

Msh Hackers

November 2024 – October 2025

Media Team Member

Suez Canal University

- Created engaging media content and technical articles for the Msh Hackers community.
- Designed promotional posters and digital graphics using Adobe Photoshop.
- Collaborated with the team to promote events and technical initiatives.
