Developer Tools & Platforms: VS Code, Git, GitHub, IntelliJ IDEA, Vercel, Lottie Animation

Experience

FlyRank AI

July 2026 – Present

Front-end AI Engineering Intern

Remote

- Implementing artificial intelligence tools into daily frontend workflows to optimize development processes and enhance web application features.
- Building multiple responsive web projects with React and TypeScript, focusing on the seamless integration of AI models into modern user interfaces.

Digital Egypt Pioneers Initiative (DEPI)

Dec 2025 – July 2026

Front-End Development Trainee

Remote

- Participant in a national modern front-end training program.
- Building responsive applications with React and TypeScript, focusing on state management and backend API integration [TIJARA].

Information Technology Institute (ITI)

July 2025

Advanced Frontend Web Development Trainee

Ismailia, Egypt

- Completed a 162-hour intensive course on advanced frontend technologies and web performance best practices.

Projects

Personal Portfolio Website | *React, TypeScript, Tailwind CSS, Framer Motion*

April 2026 – August 2026

- Developed a high-performance, responsive portfolio showcasing technical projects with pixel-perfect layouts.
- Implemented interactive animations with Framer Motion and optimized for SEO, accessibility, and fast load times across devices.

TROSC Team Website | *React, TypeScript, CSS3, Tailwind CSS*

January 2026 – August 2026

- Collaborated in an agile team to build the official TROSC website using scalable React components.
- Translated UI/UX designs into responsive interfaces and integrated frontend components seamlessly with backend REST APIs.

TIJARA (Micro-ERP System) | *React, Xano (Backend), Custom CSS*

May 2026 – July 2026

- Engineered a responsive Single Page Application (SPA) using React and a Xano backend to streamline inventory, sales, and expense management for retail businesses.
- Developed core business modules with real-time automated calculations for daily profitability, customer debt tracking, and dynamic low-stock alerts.
- Designed a mobile-first dark mode UI with an interactive dashboard and implemented custom print-ready styling for automated financial reports and PDF generation.
- Built a centralized state management architecture to handle complex business logic and enabled seamless data export via CSV and JSON backups.

Extracurricular

Msh Hackers

November 2024 – October 2025

Media Team Member

Suez Canal University

- Created technical articles, engaging media content, and promotional graphics using Adobe Photoshop to support community initiatives.
